

CYBERNETICA

Sumitomo Mitsui Trust Bank

Together with Eltes, Cybernetica provides UXP as an interoperability platform for finance and trust-banking related transactions to Japan's fifth-largest trust bank Sumitomo Mitsui Trust Bank (SMTB).

In a number of projects, UXP is being used for the analysis and development of new business models, surrounding the issues of inheritance record management. The stakeholders involved include financial institutions, local governments and corporate entities.
