

Collaborate in Confidence

Share Knowledge to Learn More Yourself

1

Access and combine datasets that may otherwise be unavailable due to privacy or trust restrictions.

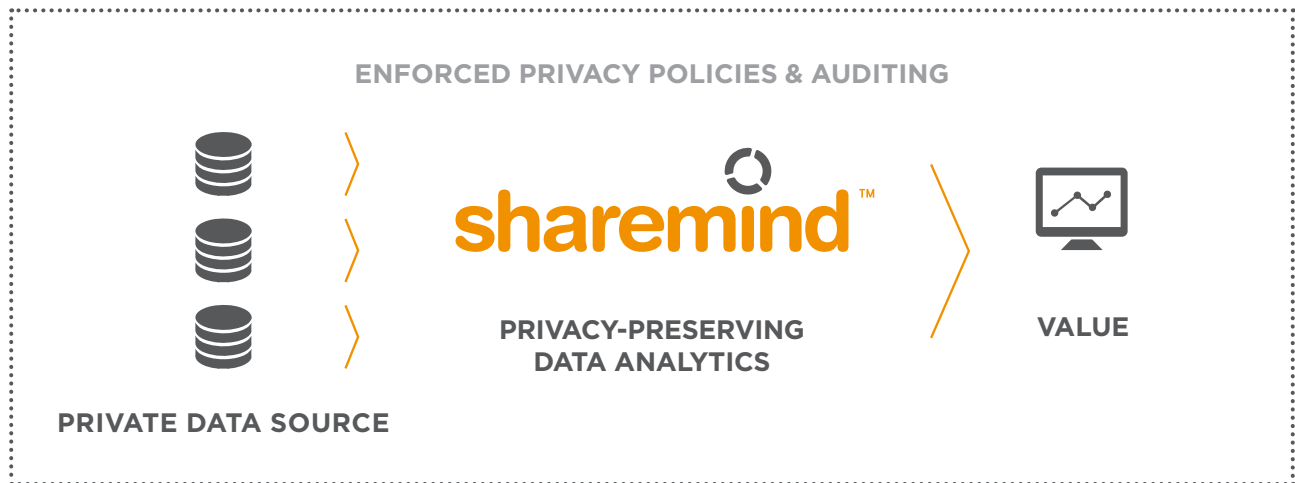

2

Run data analytics in the cloud, offshore, or in an outsourced environment, without sacrificing security.

3

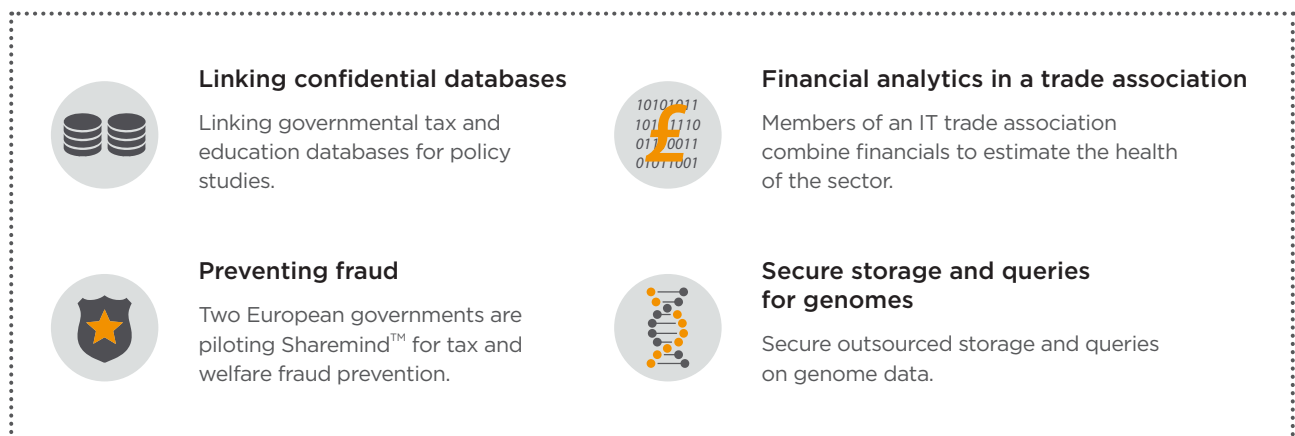

Simplify compliance to data protection requirements by keeping collected data encrypted throughout the analytics process.

Preserve Privacy while Analysing Sensitive Data

- ✓ The data is encrypted on-site by data owners and uploaded to Sharemind™
- ✓ Data analysts build and run queries without accessing the data
- ✓ Sharemind™ processes the queries without removing the protection
- ✓ Results are presented in encrypted format, accessible only by authorised users
- ✓ All computations and results follow set policies and are fully auditable
